

Lifeplayer

Product description

Our power independent Lifeplayer is an MP3 player, radio and recorder. Using a microSD card, content can be loaded onto the Lifeplayer, making quality education and information accessible on demand to anyone, anywhere, anytime. There is no limit to the amount of content that can be heard.

The Lifeplayer is offered in two versions, depending on the needs of your initiative.

	LIFEPLAYER START	LIFEPLAYER PLUS
Solar panel	Integrated 0.7 Watt polycrystalline solar panel with epoxy encapsulation	
Hand crank	Direct drive spur gear transmission driving a high power 3-phase alternator with high efficiency reticulation	
Batteries	Internal: 1300 mAh 4.8V NiMH battery pack Solar: 1300 mAh NiMH 3.6V high temperature battery pack	
Speaker	5W (max), 8-ohm paper cone loudspeaker with additional external speaker socket	
Software monitoring	No on-board software monitoring	On-board software monitoring to determine how device is being used
Antenna	FM: telescopic antenna	FM: telescopic antenna MW: Built-in ferrite bar
Frequencies	FM 88—108 Mhz SW channels optional	FM 88-108 Mhz SW1 2.3-7 Mhz MW 500-1700 kHz SW2 7-15.9 Mhz SW3 15.9-22 Mhz
Memory	One microSD card, situated internally Stores up to 128GB	Two microSD cards, one situated internally and one user-accessible Each microSD card stores up to 128GB
Recording	Via integrated microphone and off-air radio signal Recording format: WAV Playback format: MP3 and WAV	
Performance (will vary depending on volume setting)	Fully charged battery 60-second wind 1-hour solar exposure (radio off)	6 hours at normal volume 15-20 minutes at normal volume 1 hour at normal volume
Weight and dimensions	Height = 305 mm Depth = 134 mm	Width = 144 mm Weight = 1,4 kg
